PREFACE

THE AIM of this booklet is to provide an Index of the Headings under which different industries appear in the 1968 edition of the *Standard Industrial Classification*. For this purpose the names of industries have been re-arranged in alphabetical order. Alongside each is given the Minimum List Heading to which the industry is classified. The numbers of Minimum List Headings are those in the Standard Industrial Classification. Thus the entry 'Addressing machine manufacture..... 338' means that the industry 'Addressing machine manufacture' is classified in Minimum List Heading 338—Office machinery, while the entry 'Alkali manufacture..... 271/1' means that the industry 'Alkali manufacture' is classified in Minimum List Heading 271—General Chemicals, Sub-division 1—Inorganic chemicals.

NOTE

Industries and different classes of activity may be known under different names. Some industries have been classified in this alphabetical index under alternative titles by which they may be described but it has obviously not been possible to list separately all possible variations in these titles. Words such as 'manufacturing' and 'making' can often be regarded as inter-changeable and 'dealer' taken as synonymous with 'shopkeeper', 'merchant', 'agent', 'broker', or 'factor'.

Self-employed commercial travellers, manufacturers' agents and representatives are classified with the dealers or merchants handling the same commodity or range of commodities. Wholesale merchants (general or undefined) are classified in Heading 812/5.

The making-up of knitted clothes in knitting establishments is classified in Heading 417, but the making-up of clothes cut from purchased knitted fabric is classified with the making-up of other clothing in Heading 444, 445, or 449.
